CEWELD SPA FeCrBSi

TYPE	High-alloyed tubular wire on a Cr-B-Si basis for thermal spray (flame and electric)
ANWENDUNGEN	Pulling, drawing tools, cable trolleys, fan blades, dies etc.
EIGENSCHAFTEN	High temperature resistance with low friction coefficient and excellent ductile coating structure, all spray metal requires no buffer layer. Recommended for coatings against erosion and corrosion.
KLASSIFIKATION	
GEEIGNET FÜR	Applications that require low friction in combination with high temperature resistance.
ZULASSUNGEN	
SCHWEISSPOSITIONEN
