

# CEWELD SPA 55

TYPE	Cored wire for the thermal spray process
ANWENDUNGEN	Typical applications are found in devices, which are working in an abrasive environment (e.g. industrial fans) or are used for feeding abrasive goods (e.g. rollers for conveyer belts, conveyer screw housing).
EIGENSCHAFTEN	High-alloyed tubular wire for metal spray on a C-Cr carbide basis for hard and corrosion resistant deposits on parts subject to mineral abrasion. Excellent bonding strength.
KLASSIFIKATION	
GEEIGNET FÜR	Cement industry, shafts, pumps, mixer blades, fans, sleeves, mixers, shear blades, boiler tubes etc.
ZULASSUNGEN	
SCHWEISSPOSITIONEN	
(%)	
MECHANISCHE GÜTEWERTE	
RÜCKTROCKNUNG	Not required
GAS ACC. EN ISO 14175
