

CEWELD AA R460

TYPE	Seamless micro-alloyed rutile flux-cored wire for CO2 and M21.																
ANWENDUNGEN	Shipbuilding, steel and vessel construction, mechanical engineering and pipe work.																
EIGENSCHAFTEN	Excellent weld puddle manipulation due to fast freezing slag, superior out-of-position welding also at higher currents. Using temperature up to -40°C. Particularly suited for MAG-orbital welding and all-position welding on ceramic backing. Extreme low spatter loss, easy slag removal and hydrogen content below 3 ml/100g. even after long unconditioned storage.
