

CEWELD NiCro 603

TYPE Solid nickel based wire for Alloy 699 types (2.4842)

ANWENDUNGEN Chemical process industry

EIGENSCHAFTEN NiCro 603 is an alloy especially developed for high-temperature applications. Because of the high high chromium and aluminum content it has excelent metal dusting corrosion and oxidation resistance. Due to its excellent corrosion resistance.

KLASSIFIKATION

AWS	A 5.14: ~ERNiCrFe-Al-1
EN ISO	18274: S Ni Z (NiCr 30 Al)
W.Nr.	2.4842
F-nr	43
FM	6

GEEIGNET FÜR Applications in Chemical process industry, this alloy has a much higher Metal Dust resistance than our CEWELD NiCro 602 CA
