

# CEWELD SA P-24

TYPE	Vacume melted, medium alloyed, Creep resistant alloy for sub arc welding.
APPLICATIONS	High temperature and creep resistant boilers, pipe work etc..
PROPERTIES	Remarkable creep resistant micro alloy controlled alloy developed to offer high strenght and creep resistant properties at elevated temperatures. Combined with flux FL 155 excelent slag release will be obtained in single and multirun application, the neutral action of the flux offers reliable chemical annalysys to ensure the best possible creep properties.
CLASSIFICATION	
SUITABLE FOR	Creep resistant steels , 7CrMoVTiB, P24/T24, ASTM A213, pipe steel, P24/T24, ASTM A213
APPROVALS	
WELDING POSITIONS	
(%)	
MECHANICAL PROPERTIES	
REDRYING	Not required
GAS ACC. EN ISO 14175
