

CEWELD NiCrCo 5828

TYPE Welding wire for Waspaloy and similar precipitation hardening, high temperature Nickel based

alloys.l

APPLICATIONS CEWELD NiCrCo 5828 is a high temperature alloy, which is used for welding nickel-chromium-

cobalt-molybdenum alloys (UNS Number N07001). Main applications are Gas turbine engine parts,

Aerospace components, springs and fasteners.

PROPERTIES Very high strength properties at elevated temperatures, Strength is generally comparable to that of

Rene 41 and generally superior to Inconel 718. Age hardenable while maintaining excellent hightemperature strength and good corrosion resistance, notably to oxidation, at service temperatures

ranging from 1200°F (650°C) up to 1600°F (870°C)

CLASSIFICATION A 5.14: ERNiCrCoMo-2 mod

EN ISO 18274: S NiZCr20Co14Mo4Ti3

W.Nr. 2.4654 F-nr 43 FΜ

SUITABLE FOR AMS 5708, 5709, 5706, 5707, 5704, 5544, 5586.

PWA 1005, 1007, 1016, 1027.

ASTM B637.
