

TYPE Cored wire for the thermal spray process

APPLICATIONS Typical applications are found in devices, which are working in an abrasive environment (e.g.

industrial fans) or are used for feeding abrasive goods (e.g. rollers for conveyer balts, conveyer

screw housing).

PROPRIÉTÉS High-alloyed tubular wire for metal spray on a C-Cr carbide basis for hard and corrosion resistant

deposits on parts subject to mineral abrasion. Excelent bonding strenght.

CLASSIFICATION

CONVIENT POUR Cement industry, shafts, pumps, mixer blades, fans, sleeves, mixers, shear blades, boiler tubes etc.
