
CEWELD SA 430

certilas® THE FILLER METAL SPECIALIST

TYPE

Solid wire for submerged arc welding with 17% Cr.

APPLICATIONS

Cladding seats, valves, wheels, shafts etc.

PROPRIÉTÉS

Submerged arc welding wire to be used with fused flux FL 880 or agglomerated flux FL 838 flux with excellent welding properties. Stainless deposit with low carbon content. Low heat input is recommended to avoid pronounced grain coarsening. Absence of stabilization means that this steel is distinctly vulnerable to sensitization phenomenon during welding, even though martensite hogs a great amount of carbon and nitrogen.

CLASSIFICATION

AWS	A 5.9: ER430
